

25 years of leachate treatment

Enviros Leachate Safari 27 & 28 June

ENVIROS ^E

TODAY'S BUSINESS TOMORROW'S WORLD

Enviros Consulting has pioneered treatment of landfill leachate in the UK and overseas for 25 years since designing our first plant in 1982. We have now designed and commissioned 75 on-site leachate treatment plants, published nearly 200 professional papers, and developed an international reputation in this field.

To celebrate a quarter of a century of plant design, we are proud to offer our 2007 leachate safari. On 27 and 28 June we will visit up to ten leachate treatment facilities, including plants which represent the largest and most advanced in the UK, as well as simpler more typical plants. Plants discharge into the public sewer, or to surface watercourses, consistently and reliably meeting high quality discharge requirements.

Treatment processes to be demonstrated include biological reactors, constructed wetlands, dissolved air flotation, and methane stripping.

The coach tour will begin and end at Birmingham International Airport car

park, and will provide two very full days of field visits to operational leachate treatment plants, delegates being guided by acknowledged international experts.

We will stay overnight in budget accommodation (The Sleep Inn, Shrewsbury), booked by us but payable separately by delegates, and all meals will be provided including dinner at the end of the first day, at a historic restaurant in the centre of Shrewsbury.

We are anticipating heavy demand as in previous events, and places are strictly limited, so we recommend early application to avoid disappointment. Successful applicants will be informed by return, and provided with full details of our itinerary. Preference will be given to landfill operators and regulators. The charge, to cover our costs, must be paid in advance.

Full details will be published at our website. Complete the application form overleaf or visit www.leachatesafari.com for online registration.

The price of £225 + VAT includes all transport, lunches, evening meal, and a detailed delegate pack of published papers. Accommodation will be booked, but delegates will settle their own bill. The tour begins and ends at Birmingham International Airport, and provides 2 very full days of field visits, guided by acknowledged international experts.

Full details of pick-up and drop-off locations and times will be available at www.leachatesafari.com

Numbers are strictly limited to 40 delegates so early application is advised. Preference will be given to landfill operators and regulators.

To register, please contact:
